

DOCTOR DAYS AT HIPPOCRATES HEALTH INSTITUTE

1. OVERVIEW:

Doctor Days 3-Day Immersion Experience is an avenue to provide a new platform to understand all the wonderful things HHi has to offer their patient's health and lifestyle. Their patient now becomes our "guest".

2. PURPOSE:

We are through this program offering a "new phase" in the field of health, one which merges a multi-disciplinary approach to bridge the terrain of complimentary healthcare and traditional medicine.

3. INTRODUCTION:

To focus on inviting traditionally trained medical doctors, nurse practitioners, nurses and those NMDs and Naturopaths that display a code of excellence including doctors of Chiropractic Medicine and Holistic Dentists to learn more about HHi. These professionals must have an active practice and be passionate about assisting their patients to learn more about complimentary ways of healing and disease reversal.

4. THE REASON WHY:

This program is designed to create the deepest impact for the professional within the shortest period of time. We believe, along with Dr. Brian Clement, that for a professional to experience HHi first hand is imperative. Our hope is to advise the professional to interact with the guests as if they are guests themselves, and to gain insight into the magnificence of the institute. The doctors will see first hand how HHi's comprehensive approach can positively impact the body's immune system, aid in disease reversal and overall optimum health. Reminding the doctors that attend, that HHi's mission is helping people help themselves. This can then lead professionals to refer their patients to attend HHi as a guest.
